# John Chambers Wildflower Seed

John Chambers Wildflower Seed has a 35-year history of supplying native British produced wildflower seed and mixes to landscape and garden lovers across the UK. We are one of the leading authorities on native wildflower seed, distributing a comprehensive range of products to, enhance and improve the landscape environment and encourage biodiversity.

## British Native

John Chambers Wildflower Seed specialises in British Native wildflower seed, sourcing seed from growers that are long established and stringent in their collection processes.

## Wildflower Environments

Wildflower spaces have increased in importance over recent years in both rural and urban environments. It's not just wildflower lovers but landscapers, landscape architects, farmers and conservationists who recognise the added benefits of wildflowers.

We work with Landscape Architects and Ecologists across the UK to create bespoke wildflower mixes that meet specific criteria. The team takes time to consider biodiversity, location, flowering periods and project aspirations, before creating a mix suitable for a specification.

## Terms and Conditions

**John Chambers Wildflower Seed is a trading style of Green-tech Ltd.**

Prices are correct at the time of going to press and all prices quoted are in UK sterling. All prices are subject to VAT at the rate ruling and should be treated as a guide only. Orders will be accepted via our website, by telephone, fax, in writing or by email. All orders must be confirmed in writing.

Deliveries will be made as soon as possible after an order is placed, unless a delivery date is specified. The company cannot guarantee a time or date of delivery. Access to the delivery address is the customer's responsibility. We must be informed of any site restrictions.

A full detailed list of our terms and conditions can be found on our website, [www.johnchamberswildflowers.co.uk](http://www.johnchamberswildflowers.co.uk).

We reserve the right to alter our terms, conditions and specifications at any time without prior notice. A copy of our current terms and conditions can be requested at any time. We are not responsible for delays of any deliveries.

# The John Chambers Team

John Chambers Wildflower Seed has a 35-year history of supplying native British produced wildflower seed and mixes to landscape and garden lovers across the UK. We are one of the leading authorities on native wildflower seed, distributing a comprehensive range of products to, enhance and improve the landscape environment and encourage biodiversity.

Selecting the correct wildflowers for a project can be a daunting task. We have researched soil types, environmental considerations and flowering periods of each individual stocked seed to provide the best possible advice. We have developed a portfolio of wildflower seed mixtures that are specifically suited to particular growing environments and soil types, producing colourful displays of wildflowers with a balanced mix of species to enhance the environment and attract wildlife.

"The team at John Chambers Wildflowers are passionate about creating beautiful and biodiverse wildflower areas. On a roadside, domestic garden, roundabout or even on a green roof there has been a dramatic rise in landscape specifications that have converted areas into wonderful, colourful havens for insects, bumble bees and birds. Our team has a wealth of knowledge to advise on the best seed mix for your project taking into account soil types among other factors to ensure the best results."

# Professional Seminars at your Workplace

Without a doubt, wildflower spaces have increased in importance in recent years and are now regularly seen in rural and urban settings. No longer just the love of wildflower enthusiasts, wildflower meadows are recognised for their numerous benefits for the environment and are specified in many high-profile projects across the UK.

After many years of working with landscape architects, garden designers and landscapers the John Chambers Wildflower team has extensive knowledge and experience of the landscaping environment and can share this with you in an 'Introduction to John Chambers Wildflowers' CPD. We can bring this seminar to your workplace and we'll even provide breakfast or lunch for your team!

## **Our CPD seminar: The Introduction to John Chambers Wildflowers**

The CPD gives a high-level overview and covers the history of wildflowers and the importance of seed supply and provenance. We'll take you through considerations surrounding soil type and the environment; conservation and the impact on biodiversity. At the end of the CPD you will have a good understanding of the importance that location, climate, flowering periods and soil type will have on the outcome. We'll finish

with a step by step guide to producing a wildflower meadow – what to do and when, what to look out for, the types of wildflowers available and the quantities you should be specifying.

**Book your CPD online today at  
[www.johnchamberswildflowers.co.uk](http://www.johnchamberswildflowers.co.uk)  
or contact us on 01423 332115**

# Wildflower Seed Sowing Preparation

## Sowing Into Bare Soil

### 100% Wildflower Mixes (sowing rate 1 – 2g/m<sup>2</sup>)

For the best results, sow 100% wildflower mixes into bare soil, following the sowing instructions opposite. You may add 1 or 2g/m<sup>2</sup> of Cornfield Annuals to the mix for extra first year colour, as some perennial species will not flower until the 2nd year.

### Grass and Wildflower Seed Mixes (sowing rate 4 – 5g/m<sup>2</sup>)

Follow the sowing instructions opposite. Due to the maintenance required in the first year to establish perennial wildflower seed, expect most of these species to flower in the 2nd year. In the first growing year, every 4 weeks, cut all growth back

to 60 – 70mm, this will give the slower-growing perennial wildflowers the chance to establish. If sown with annuals, after flowering, cutting-back should stimulate a second flush later in the year.

## Sowing Into Existing Grassed Areas

### 100% Wildflower Mixes (sowing rate 1 – 2g/m<sup>2</sup>)

Sowing wildflower seed into established areas of grass will vary in degree of success. For best results, sow either a 100% wildflower seed mix or an 80/20 grass/wildflower mix into bare soil using the sowing instructions opposite.

### Sowing Instructions

1. The sowing area should be cleared of vegetation prior to sowing the seed (spraying off a few weeks before sowing or by other means).
2. Prepare a fine seed bed and sow lightly at the correct sowing rate, evenly, either manually or by mechanical means (drilled, hydro-seeded etc). You can mix the seed with fine, dry sand or sawdust to bulk out the mix and make it easier to sow.
3. To ensure good contact between the seed and moisture in the soil, the sown area should be lightly pressed down either by a light roller or other methods, depending on the type of area. It is important that the seed does not dry out, so it will be beneficial to water the area in the first few weeks if dry weather prevails.
4. In year 1, 80/20 mixes should be cut back every 4 weeks or so, to suppress grasses and assist perennial wildflower species in their establishment.
5. At the end of the summer or in early autumn, make a final cut after flowers have shed their seed, collect and remove cuttings. No maintenance required during winter.
6. From Year 2 onwards, you may wish to cut back any winter growth in early Spring, removing the cuttings afterwards. The area can be left throughout the flowering season and cut back only when flowering has finished and seed has shed at the end of summer or early autumn. As the area establishes, the wildflowers will strengthen and proliferate, giving a stronger display year-on-year.
7. Spot treat or remove invasive weeds.

# Heritage Wildflower Seed

The Heritage Range of Wildflower Seed from John Chambers, is a portfolio of British native mixes that have been developed and planted by landscapers, architects and garden designers for over 35 years. Renowned for the quality of its seed, the Heritage range retains the original recipes created by the business founder John Chambers. All seed is of optimum quality, will provide exceptional germination and is cleaned by hand ensuring that only pure and uncontaminated seed arrives at your project.

## Certificate of Authenticity

Every Heritage mix supplied will be accompanied by a certificate of authenticity, listing the species and recipe for your mixture. This certificate is an integral part of the John Chambers quality management process, ensuring that the wildflower seed as specified arrives on site, providing peace of mind for the specifier, installer and client.

All wildflower seed mixes are subject to change dependent on time of year and harvest.

## Heritage Acid Soils Mix

For moderately acid soils (pH 4 - 5.5)

Vetch; Common  
Bluebell or Wild Hyacinth  
Marigold; Corn  
Vetch; Tufted  
Chicory  
Clover; White  
Cornflower  
Poppy; Field or Common  
Bird's-foot-trefoil; Common  
Heather or Ling  
Trefoil; Lesser  
Fumitory; Common  
St John's Wort; Perforate or Common  
Scabious; Devil's-bit  
Betony  
Foxglove  
Teasel  
Pansy; Wild or Heartsease  
Harebell  
Daisy  
Tormentil

Available as both a 100% mix and an 80/20 mix  
(80% low maintenance grass and 20% wildflowers)

100% Seed	80% Grass Seed
£239.00/kg	£60.00/kg

## Heritage Calcareous Soils Mix

For chalk and limestone rich soils  
(pH above 7)

Burnet; Salad  
Agrimony  
Knapweed; Common or Hardheads  
Medick; Black  
Yellow-Rattle or Hay-Rattle  
Carrot; Wild  
Selfheal  
Bedstraw; Lady's  
Scabious; Field  
Daisy; Oxeye  
Bird's-foot-trefoil; Common  
Vetch; Kidney  
Yarrow  
Knapweed; Greater  
Scabious; Small  
Hawkbait; Rough  
Mignonette; Wild  
Basil; Wild  
Plantain; Hoary  
Cowslip

Available as both a 100% mix and an 80/20 mix  
(80% low maintenance grass and 20% wildflowers)

100% Seed	80% Grass Seed
£239.00/kg	£60.00/kg

## Heritage Wildflower Seed

## Heritage Clay Soils Mix

For heavier clay soils

Burnet; Salad  
Buttercup; Meadow  
Knapweed; Common or Hardheads  
Medick; Black  
Plantain; Ribwort  
Carrot; Wild  
Yellow-Rattle or Hay-Rattle  
Bedstraw; Lady's  
Daisy; Oxeye  
Bird's-foot-trefoil; Common  
Sorrel; Common  
Vetch; Kidney  
Knapweed; Greater  
Selfheal  
Cat's ear  
Hawkbitt; Rough  
Yarrow  
Plantain; Hoary  
Crane's-bill; Meadow  
Cowslip

Available as both a 100% mix and an 80/20 mix  
(80% low maintenance grass and 20% wildflowers)

100% Seed	80% Grass Seed
£239.00/kg	£60.00/kg

## Heritage Loam Soils Mix

Most suited for loamy and alluvial soils

Burnet; Salad  
Medick; Black  
Yellow-Rattle or Hay-Rattle  
Knapweed; Common or Hardheads  
Buttercup; Meadow  
Plantain; Ribwort  
Sorrel; Common  
Carrot; Wild  
Daisy; Oxeye  
Selfheal  
Bird's-foot-trefoil; Common  
Campion; White  
Bedstraw; Lady's  
Dandelion; Common  
Yarrow  
Cat's ear  
Ragged-Robin  
Plantain; Hoary  
Cowslip  
Mouse-ear; Common

Available as both a 100% mix and an 80/20 mix  
(80% low maintenance grass and 20% wildflowers)

100% Seed	80% Grass Seed
£209.00/kg	£52.00/kg

## Heritage Sandy Soils Mix

For free-draining, sandy areas and soils

Knapweed; Common or Hardheads

Yellow-Rattle or Hay-Rattle

Medick; Black

Carrot; Wild

Selfheal

Vetch; Kidney

Bedstraw; Lady's

Daisy; Oxeye

Bird's-foot-trefoil; Common

Mallow; Musk

Viper's-bugloss

Dandelion; Common

Yarrow

Weld or Dyer's Rocket

Campion; Bladder

Hawkbit; Rough

Mignonette; Wild

Forget-me-not; Field

Plantain; Hoary

St John's Wort; Perforate or Common

## Heritage Wet and Damp Soil Mix

High water-retaining soils

Iris; Yellow

Buttercup; Meadow

Campion; Red

Vetch; Tufted

Meadowsweet

Avens; Water

Mallow; Musk

Angelica; Wild

Ramsons or Wood Garlic

Scabious; Devil's-bit

£379.00/kg	£95.00/kg

## Case study:

# York University in Bloom

**The main campus in York University, Heslington has undergone a £750m campus expansion programme which included developing the landscape of the Heslington East campus.**

As part of the expansion programme, the Grounds Maintenance team were tasked with supporting the biodiversity of the campus to make sure it is a suitable habitat for wildlife and wildflowers, whilst being attractive for students and visitors.

The John Chambers Wildflower Seed team advised on species, ground conditions and wildlife goals before supplying the most appropriate seed for the various areas. The John Chambers Conservation Best 6 Annuals Mix featured heavily in the planting scheme and produced a spectacular display of colour as the mix includes Poppy, Cornflower and Marigold.

The campus has been in full bloom and been well received. Wentworth Way roundabout, in particular, has proved so popular that several residents have written to the regional newspaper, York Press. They

commented about the “absolutely stunning wildflower display at the University Road roundabout”, advising how readers had described it; “wow – what a display!” and “surely this must be the most beautiful roundabout in Britain.”

Gordon Eastham, University Grounds Maintenance Manager commented, “The Best 6 Annuals Mix has performed particularly well and given us some high impact pockets of colour around campus in several high-profile areas, which in turn has provoked a great deal of interest and lots of appreciative feedback. About 10% of the University estate is now given over to wildflowers (mostly perennials) and the aim now is to systematically broaden the species range via help and advice from John Chambers Wildflower Seeds.”

# Bespoke Wildflower Seed Mixes

At John Chambers we take pride in the preparation, cleaning and mixing of our seeds. This care ensures the mix is supplied to your specification and is of the highest quality.

John Chambers classifies its wildflower seed by the following considerations:

- Soil type
- Growing environment
- Colour
- Height
- Flowering period
- Sowing period

The team at John Chambers can create a mix for your project or landscape area that is suited to the specific considerations of the growing environment. Whether you would like an 'all blue' mix to mark a special event or a wildflower mix that is best suited to moist and damp soils, the John Chambers team are available to answer your questions. Email [sales@johnchamberswildflowers.co.uk](mailto:sales@johnchamberswildflowers.co.uk) or call 01423 332 115.

Pick your wildflower mix online at [www.johnchamberswildflowers.co.uk](http://www.johnchamberswildflowers.co.uk)

# Professional Wildflower Seed

A range of wildflower seed for the professional installer, the Pro-range provides a series of mixes that have been modified to include more commonly found species to suit a wide variety of growing conditions. These mixes provide the professional installer with a beautiful wildflower habitat, encouraging biodiversity in urban landscapes and is backed up by the John Chambers promise of superior quality wildflower seed for your project.

Single species available at  
[www.johnchamberswildflowers.co.uk](http://www.johnchamberswildflowers.co.uk)

All wildflower seed mixes are subject to change dependent on time of year and harvest.

Pansy; Field
Forget-me-not; Field
Fumitory; Common
Pansy; Wild or Heartsease

100% Seed	80% Grass Seed
£80.00/kg	N/A

100% Seed	80% Grass Seed
£150.00/kg	N/A

Our annuals mixes contain some fast-establishing perennials for additional diversity

## Case study:

# Wick Community Campus Project

**A new £48 million Wick Campus project; part of the Scottish Government 'Scotland's Schools for the Future programme' was commissioned by the Highland Council.**

The 17,500m<sup>2</sup> campus replaced the previous Wick High School and consolidated a number of existing primary schools, a nursery, sports facilities, a community library and swimming pool; into one integrated community facility.

Ashlea Limited, one of the UK's largest privately-owned commercial landscaping companies, were awarded the contract for soft landscaping which included wildflower seeding around the extensive grounds of Wick Campus.

They turned to John Chambers Wildflower Seed who supplied over 300kg for phase 2 of the project, including a specialist eco species rich lawn mix and planting compost.

John Chambers Wildflower Seed is sourced from growers that are long established and stringent in their collection processes; it is cleaned by hand, a labour-intensive process that will only achieve the highest quality

standards. The team of specially trained seed cleaners only dispatch the best seed that ensures optimum growth and success no matter the climate or soil quality.

Commenting on the project Stuart Simpson, a Director of Ashlea Limited said, "The establishment of the wildflower area has been excellent. It was first seeded in May 2018 during the very dry period we experienced this summer. The establishment of the flowering lawn has been excellent, one of the best we have ever created. Being so far north in Scotland the site is subject to ever changing weather conditions and an almost constant wind. John Chambers Wildflower Seed is hand prepared and of excellent quality. We have used their seed on many other projects; always with outstanding results."

# Impact Wildflower Seed

A range of vibrant and colourful wildflower seed mixes that will become a feature of any landscaping project. The IMPACT range incorporates a mix of cultivated and native species designed to complement urban landscapes and especially hard landscaped projects. These wildflower mixes provide an excellent balance of colour, height and flowering periods ensuring the seed supplied will live up to expectations.

## Impact Classic Colour Mix

Colourful mix, easy to grow and great for open spaces

Shirley Poppy

Californian Poppy

Cornflower

Fairy Toadflax

Tickseed

Red Orache

Larkspur

Annuals/Perennials	100% Seed
Annuals	£209.00/kg

## Classic Colour 'Low Growing' Mix

Flower beds, lawns, pots and window boxes

Shirley Poppy

Red Flax

Cornflower

Fairy Toadflax

Dwarf Tickseed

Annuals/Perennials	100% Seed
Annuals	£199.00/kg

## Impact Wildflower Seed

### Impact Sunray Mix

Ideal for verges and open spaces

Californian Poppy

Corn Marigold

Calendula

Blue Cornflower

Golden Tickseed

Annuals/Perennials	100% Seed
Annuals	£199.00/kg

### Impact Blue Vista Mix

Ideal for livening up any area, large or small

Cornflower

Blue Larkspur

Blue Salvia

Viper's Bugloss

Annuals/Perennials	100% Seed
Annuals	£199.00/kg

### Impact Sweet Shop Mix

Pastel shades, ideal for adding colour to any area

Tickseed

Cornflower

Fairy Toadflax

Californian Poppy

Field Poppy

Corn Marigold

Annuals/Perennials	100% Seed
Annuals	£199.00/kg

### Impact Violet Heart Mix

Long lasting perennials giving a great look to open spaces. A mix of native and cultivated species.

Grandmother's Garden

Oxeye Daisy

Greater Knapweed

# Conservation Wildflower Seed

A selection of wildflower mixes for various purposes and situations in grounds and gardens. Carefully selected, balanced mixes will help to provide colour and food, attracting Wildlife into the spaces where they are sown. These mixes are best sown into bare soil without grasses to achieve intended results and are particular suitable for creating ornamental display beds and borders.

## Conservation Specialist's Mix

Containing many beautiful countryside plants from a variety of habitats. Most are not well known, though often closely related to those that are.

Betony	Hemp-agrimony
Common Mallow	Slender St John's Wort
Wild Pansy	

Packet	10g	1kg
£2.50	£7.50	£295.00

## Conservation Wild Bird Mix

This mix contains many beautiful wild flowers, including a number which are attractive to most seed-eating birds, butterflies and other insects.

Bird's-foot Trefoil	Teasel
Greater Knapweed	Cowslip
Corn Marigold	

Packet	10g	1kg
£2.50	£7.50	£265.00

## Conservation Wildflower Seed

### Conservation Best 3 Annuals Mix

Highly recommended by John Chambers, this mix contains only Field Poppy (red), Corn Marigold (yellow), Corn Chamomile (white) plus Scentless Mayweed. Together, they make a spectacularly compatible and colourful combination which will rival even the most showy mixtures of cultivated annual flowers.

Corn Chamomile	Scentless Mayweed
Corn Marigold	Field Poppy

Packet	10g	1kg
£2.50	£7.50	£92.00

### Conservation Best 6 Annuals Mix

To the Best 3 Annuals Mix we have added three more cornfield annuals. They are all taller species Corncockle (purple) Cornflower (blue) and White Campion (white). The different colours and flowering habits of the flowers in the mixture are exceptionally complementary to each other and produce a uniquely showy and colourful combination.

Corncockle	Corn Marigold
Cornflower	Scentless Mayweed
Corn Chamomile	Field Poppy

Packet	10g	1kg
£2.50	£7.50	£102.00

### Conservation Bats In The Garden Mix

Containing a wide range of attractive nectar-rich species of wildflowers, cultivated flowers and herbs. Many have night-scented flowers that are particularly attractive to night-flying insect on which bats feed.

Bladder Campion	Soapwort
Evening Primrose	Red Valerian
Fleabane	

Packet	10g	1kg
£2.50	£7.50	£280.00

### Conservation Countryside Garden Mix

A mix of easy-to-grow and attractive native species, including many perennials plus three cultivated flowers: Dame's Violet (Sweet Rocket), Honesty and Red Valerian. A pleasure to have in your garden for the butterflies, bees, insects and birds they attract.

Cat's-ear	Ragged Robin
Hemp-Agrimony	Small Scabious
Wild Marjoram	Common Sorrel

Packet	10g	1kg
£2.50	£7.50	£225.00

All wildflower seed mixes are subject to change dependent on time of year and harvest.

## Conservation Easy and Colourful Mix

Selected by John Chambers for newcomers to wild flower gardening. It contains a selection of some of Britain's most showy and attractive wildflowers which flower abundantly and are easily grown. Some species are of value as sources of food for butterflies, bees and other insects.

Lady's Bedstraw	Field Scabious
Salad Burnet	Kidney Vetch
Musk Mallow	Yellow Rattle

Packet	10g	1kg
£2.50	£7.50	£189.00

## Conservation Bumblebee Mix

Selected by John Chambers it contains beautiful wild flowers many rich in nectar, which are known to be especially attractive to bumblebees. By cultivating a small area of bumblebee food plants in your garden you will be helping to conserve these important pollinators.

Bird's-foot Trefoil	Purple Loosestrife
Foxglove	Kidney Vetch
Greater Knapweed	Viper's-Bugloss

Packet	10g	1kg
£2.50	£7.50	£295.00

## Conservation Honeybee Mix

Contains attractive nectar and pollen-rich plants of horticultural merit, known to be particularly useful for attracting the European Honeybee to gardens. Help this important pollinator by growing this mix in your garden.

Foxglove	Meadowsweet
Hound's-tongue	Purple Loosestrife
Wild Marjoram	Viper's-bugloss

Packet	10g	1kg
£2.50	£7.50	£195.00

**Did you know?** We have only one species of honeybee in the UK – the European Honeybee!

## Conservation Wildflower Seed

### Conservation Scented Flowers Mix

A selection of colourful and attractive native species well known for the fragrance of their flowers and/or the scents given off freely from their leaves. Apart from providing a fragrant garden the flowers may be used for ornamental, decorative, culinary or medical purposes.

Cowslip	Great Mullein
Evening Primrose	Primrose
Meadowsweet	Soapwort

Packet	10g	1kg
£2.50	£7.50	£295.00

### Conservation Windowbox Mix

A collection of low-growing native perennial and annual species, suitable for growing in various containers and tubs in the garden or any other small outdoor space.

Sea Campion	Wild Pansy
Daisy	Wild Strawberry
Forget-me-not	Thrift

Packet	10g	1kg
£2.50	£7.50	£295.00

### Conservation Edible Roots, Stems and Leaves Mix

Offers a wide range of wild plants and weeds for growing under garden conditions to provide a succession of roots, stems and leaves which are good to eat. Most are to be cooked as 'green or root vegetables' before being eaten.

Salad Burnet	Garlic Mustard
Chicory	Common Sorrel
Dandelion	Wild Strawberry

Packet	10g	1kg
£2.50	£7.50	£285.00

### Conservation Show Garden Mix

Selected by John Chambers this mix contains native flower species whose outstanding horticultural merits make them ideal subjects for a show bed or border. Many are the wild forms (or closely related species) of familiar and popular cultivated seed.

Oxeye Daisy	Purple Loosestrife
Evening Primrose	Ragged-Robin
Hound's-tongue	Viper's-Bugloss

Packet	10g	1kg
£2.50	£7.50	£249.00

Single species available at  
[www.johnchamberswildflowers.co.uk](http://www.johnchamberswildflowers.co.uk)

# UK Native Wildflower Bulbs

## Autumn Bulbs

Available from late August to mid November

Name	Latin Name	100 Bulbs	1000 Bulbs
Wild Garlic	Allium ursinum	£24.00	£216.00
Wood Anemone	Anemone nemorosa	£20.00	£162.00
Winter Aconite	Eranthis hyemalis	£19.00	£144.00
Snakeshead Lily	Fritillaria meleagris	£15.00	£108.00
Common Snowdrop	Galanthus nivalis single	£15.00	£126.00
Double Snowdrop	Galanthus nivalis double	£34.00	£306.00
English Bluebell	Hyacinthoides non-scripta	£25.00	£216.00

Common Snowdrop	Galanthus nivalis single	£16.00	£140.00
Double Snowdrop	Galanthus nivalis double	£24.00	£220.00
English Bluebell	Hyacinthoides non-scripta	£30.00	£260.00
Lent Lily	Narcissus pseudonarcissi lobularis	£40.00	£360.00
Lily of the Valley	Convallaria majalis	£44.00	£400.00

# Plantlife & Agricultural Range

John Chambers Wildflowers work closely with Plantlife, the charity conserving Britain's native, wild flora. Alongside Dr Trevor Dines, Plantlife's Botanical Specialist, we have formulated an exclusive range of 100% wild flower mixes that are available through the Plantlife website.

10 mixes available, including:

- Meadow Maker
- Perfect for Pollinators
- Liking it Limey
- Rooted in Clay

Plus a range of over 20 native wildflower species.

**Don't forget our range of Wildlife Habitats on pages 38 – 39. They enhance any improvement scheme and give the native fauna a place of shelter when they need it!**

By purchasing these seeds, you are helping to support Plantlife. John Chambers Wildflowers makes a donation for all sales through the Plantlife shop:

- 25p is donated for every pack of seeds sold
- 10% donation made for all larger packs of seed, from 25g up to 1kg

Plantlife seed mixes help you (and your bees and butterflies) enjoy native flowers in your garden.

For wildflower gardening tips and advice, visit [www.plantlife.org.uk/uk](http://www.plantlife.org.uk/uk).

## Agricultural

John Chambers Wildflowers can offer wildflower mixes to help you with your land requirements, including Stewardship and Countryside schemes.

Simply get in touch by calling 01423 332115 or email [sales@johnchamberswildflowers.co.uk](mailto:sales@johnchamberswildflowers.co.uk), tell us the details of the agreement that need to be met and we can do the rest!

# Grass Seed

## Landscaping with Rye

Landscaping grass seed with rye for general purpose/amenity. Used by landscapers across the UK. 35g/m<sup>2</sup>

Dwarf Turf Perennial Ryegrass Mix

Hardwearing Appearance Drought Tolerance Shady Area Low Maintenance

# Wildflower Turf

**Wildflower Turf products are pre-grown under controlled, specialist conditions and delivered direct to site to provide instant impact and wildlife benefits for your project.**

## Benefits

- Wildflower-rich turf containing little or no grass to aid establishment and impact
- Easy and quick to install\*
- Low maintenance – usually cut once a year, after seed has set
- Wildlife-friendly wildflower species attract important pollinators such as bees and butterflies
- Long-flowering, diverse displays

\*Wildflower turf is a living product. As with other living turf products, in order to avoid drying-out, Wildflower turf should be installed on the day of delivery. In order to avoid disappointment, please ensure you have made adequate arrangements.

## Ideal for:

- General Landscaping
- Bespoke Garden Designs
- Specialist Landscaping
- Golf Courses

We have a range of Wildflower Turf products available for delivery, please enquire for pricing.

We will require the following in order to provide costs for you:

- Delivery postcode
- Quantity of turf required (m<sup>2</sup>)

# Wildlife and Insect Habitats

## Original Bat Box with Double Chamber

Solid, high quality, durable timber provides insulation and longevity. A narrow entrance slot and timber help discourage predators. Swing panel aids cleaning.

Size (H x W x D)	Weight	Price
280mm x 160mm x 160mm	1.6kg	£19.99

## Conservation Bat Box

Made from solid, untreated, durable timber which provides insulation and longevity. Features twin vertical chambers with angled cut-away showing ladder style grooves for bats to climb up.

Size (H x W x D)	Weight	Price
450mm x 330mm x 140mm	2.4kg	£41.66

### Conservation Nest Box

Made from solid, durable timber with a painted front panel (water-based) this nest box can be converted to an open front bird box by removing the upper front panel.

Size (H x W x D)	Weight	Price
300mm x 160mm x 200mm	1.3kg	£27.49

### New England Nest Box

Made from solid, durable timber with a shingle roof and a metal hole protector. Perfect for small bird species. Install at least 1.5m – 2.5m above ground level where it can't be accessed by predators.

Size (H x W x D)	Weight	Price
250mm x 200mm x 180mm	0.65kg	£12.49

### Urban Range

A contemporary range of habitats with sleek designs to complement the urban environment. Constructed using ultra-modern materials and timber. Install in square or diamond hanging position.

Size (H x W x D)	Weight	Price
430mm x 180mm x 1164mm	0.9 - 1.5kg	£18.74 ea

### Pollinating Bee Log

An air-dried natural timber log with natural bark provides insulation for developing larvae inside the tubes which means this bee log can stay outside during winter. Appearances may vary.

Size (H x W x D)	Weight	Price
160mm x 190mm x 160mm	1.5kg	£13.33

# John Chambers®

## WILDFLOWER SEED

John Chambers Wildflower Seed has a 35 year history of supplying native British produced wildflower seed and mixes to landscape and garden lovers across the UK. John Chambers is one of the leading authorities on native wildflower seed, distributing a comprehensive range of products that protect, enhance and improve the landscape environment.

- 100% Wildflower Mixes
- 80% Grass and 20% Wildflower Mixes
- Conservation Mixes
- Bespoke Mixes
- Native and Non-Native Single Species

The John Chambers team takes pride in the quality of the wildflower seed it supplies, whether as part of a mix for a landscape project or a single species for your garden. All seed supplied is hand-prepared and of the highest quality:

- Cleaned by hand
- Dust, mite and insect free
- Good, honest advice
- Hundreds of species to choose from
